|---------------------------|--|
| OVERALL COURSE OBJECTIVE: | Critique IT Service Management (ITSM) principles and the ITIL framework, justifying their significance in delivering reliable IT services. Evaluate service design and strategy techniques to recommend solutions that align IT services with organizational objectives and customer needs. Develop incident and problem management strategies to ensure efficient service operations and customer satisfaction. Construct frameworks for change and release management to maintain stability during service transitions. Design continual service improvement plans, integrating feedback loops and performance metrics to enhance service quality. |

LEARNING OUTCOME:

- 1. Critique ITSM concepts and the ITIL framework to justify their significance in managing IT services efficiently.
- 2. Evaluate service design principles to prioritize strategies that align IT operations with business goals and customer needs.
- 3. Develop workflows for incident and problem management that enhance service reliability and customer satisfaction.
- 4. Construct change and release management plans that maintain stability during service transitions while ensuring compliance with industry standards.
- 5. Design continuous service improvement plans by integrating performance metrics and customer

| 7 | TABLE 2: MODULE WISE COURSE CONTENT AND OUTCOME | | | | | |
|-------|---|--|--|-------------------|--|--|
| SL.NO | MODULE NAME | MODULE CONTENT | MODULE LEARNING OUTCOME | DURATION (HRS) | | |
| 1 | Introduction to IT Service Management | - Overview of ITSM concepts - Components of the ITIL framework - Business benefits of ITSM | Critique ITSM concepts and justify their importance in improving business operations. | 9 | | |
| 2 | Service Design and Strategy | Principles of service designManaging SLAsCost optimization and risk management in strategy | Evaluate service design principles and recommend strategies for aligning IT services with business needs. | 9 | | |
| 3 | Service Transition and Operations | Managing service transitions Incident and problem management Testing and validation strategies | Develop strategies for managing incidents, problems, and service transitions effectively. | 9 | | |
| 4 | Continual Service Improvement | - Identifying metrics for improvement - Feedback loops in service management - Performance evaluation techniques | Design comprehensive improvement plans to enhance service quality and customer satisfaction. | 9 | | |

| 5 | Governance, | - IT governance | Construct | 9 |

| management frameworks. | transitions with minimal disruption. | service transitions through structured release plans. | financial institution, ensuring operational continuity. |
|---|---|---|---|
| Design continual service improvement plans. | Recommend metrics and feedback loops for evaluating and improving IT services. | Creates comprehensive improvement plans based on performance metrics and customer feedback. | Use Case 5: Propose a continual improvement strategy for an e-commerce platform to enhance service performance. |

| TABLE 4: LIST OF FINAL PROJECTS (PROJECTS THAT |
|---|
| COMPREHENSIVELY COVER ALL THE LEARNING OUTCOME) |

| | - |
|-------|---|
| SL.NO | FINAL PROJECT |
| 1 | Develop a system to categorize, prioritize, and resolve IT incidents efficiently, including user communication workflows. |
| 2 | Create a framework for assessing, approving, and implementing IT service changes while managing associated risks and impacts. |
| 3 | Design SLAs for an organization, monitor service performance, and prepare reports to evaluate compliance. |
| 4 | Identify root causes of recurring IT issues, develop long-term resolutions, and maintain detailed documentation. |
| 5 | Build a knowledge base for IT service teams to document, share, and update information for incident and problem resolution. |
| 6 | Create a governance framework to ensure adherence to regulatory and compliance standards, such as GDPR or ISO 20000. |
| 7 | Evaluate current service delivery models and propose strategies for cost reduction while maintaining service quality. |
| 8 | Develop a plan to identify and mitigate risks associated with IT service transitions and daily operations. |
| 9 | Design and implement automation for repetitive service desk |

| | tasks, such as password resets or account provisioning. |
|----|--|
| 10 | Build a dashboard to track key performance indicators (KPIs) and implement feedback loops for service improvement. |

| TABLE 5: COURSE ASSESSMENT RUBRICS (TOTAL MARKS: 75) | | | | | |
|--|--|---|---|---|------------------------|
| ASSESSME NT CRITERIA | Learning Outcome | Fair (1-5) | Good (6– 10) | Excellent (11-15) | TOTA L MARK S |
| Understandi ng ITSM Concepts | Critique ITSM concepts and the ITIL framework . | Basic understandi ng of ITSM and ITIL principles with limited real-world applications. | Demonstrat es adequate understandi ng with some practical applications | Provides comprehens ive critiques with real- world applications and case studies. | 15 |
| Service Design and Strategy | Evaluate service design principles. | Limited application of service design principles; minimal understandi ng of SLAs and cost factors. | Demonstrat es moderate application of design principles and SLA developme nt. | Offers detailed evaluations with innovative strategies for service alignment and optimization . | 15 |
| Incident and Problem Managemen t | Develop incident and problem manageme nt strategies. | Creates basic workflows with limited effectivenes s in resolving issues. | Designs functional workflows for incident resolution with moderate efficiency. | Develops advanced strategies with innovative solutions for minimizing recurring issues. | 15 |

| Change and Release Managemen t | Construct change and release manageme nt framework s. | Basic frameworks with limited consideratio n of service stability. | Proposes functional frameworks for managing service transitions with moderate success. | Designs robust frameworks that ensure smooth transitions with minimal disruptions. | 15 |
|---|---|---|--|---|----|
| Continual Service Improveme nt | Design continual service improvem ent plans. | Limited metrics and feedback loops; lacks comprehens ive improvemen t strategies. | Demonstrat es functional improveme nt plans with adequate use of metrics and feedback. | Creates advanced improvemen t strategies with detailed metrics and actionable feedback integration. | 15 |
